

OVERVIEW OF PEDIATRIC OCULAR EMERGENCIES

Mohamad Elsada MD
Professor of Pediatric ophthalmology
Cairo University

Pediatric Ocular Emergencies

*Is a sudden unforeseen
pathology needing prompt
action.*

Pediatric Ocular Emergencies

Ocular emergency is either life threatening or vision threatening, preventing development of normal binocular vision or irreversibly deteriorating already existing normal visual system.

Congenital Median Facial Cleft

Congenital Ocular Emergencies

Repair of Median
Facial Cleft

Congenital Ocular Emergencies

Bilateral
Sclerocornea

Inflammatory Ocular Emergencies

Acute Dacryocystitis
and Cellulitis

Inflammatory Ocular Emergencies

Congenital Mucocele
and Secondary
Infection

Inflammatory Ocular Emergencies

Keratitis and Corneal
Opacities

Inflammatory Ocular Emergencies

Acute and Chronic
Uveitis

Inflammatory Ocular Emergencies

Bilateral Optic
Neuritis

Inflammatory Ocular Emergencies

Orbital Cellulitis

Neoplastic Ocular Emergencies

Bleeding Orbital Hemangioma

Neoplastic Ocular Emergencies

Bleeding and
infection in Orbital
Neoplasm

Neoplastic Ocular Emergencies

Orbital Teratoma

Neoplastic Ocular Emergencies

Orbital Extension of
Retinoblastoma

Neoplastic Ocular Emergencies

Orbital Extension of Retinoblastoma

Life Threatening Ocular Emergencies

- Bilateral Papilledema
- Sudden Onset Strabismus
- Sudden Onset Nystagmus
